

World War 1 Interactive Display Package

Aircraft

A package providing an overview of Aircraft in World War 1

In order to break the stalemate of the World War 1 trenches, the world's first military aircraft were developed. They subsequently played a key part in breaking stalemate through bombing and reconnaissance. The package includes 25 screens of information covering the main aspects of Aircraft use in World War 1.

Over 16 million people lost their lives in World War 1. This free package covers the human cost of war and how casualties were mourned and remembered, then and now. It goes beyond World War 1 with an optional section on today's National Memorial Arboretum including the poignant 'Shot at Dawn' memorial.

World War 1 Remembrance is an off-the-shelf multimedia package designed especially for museums and education. It can be used as-is or tailored in-house to add whatever extra information is wanted. The graphics and branding can be changed too so that any institution can tailor it to 'make it their own'.

The Benefits of Using InfoAktiv.

Because it runs on an InfoAktiv system, the package is amazingly easy to tailor, expand, adapt and update. It can be modified by anybody who can use a PC. This removes any reliance or expense associated with using outside contractors and makes it a perfect and very gratifying project for volunteers to work on.

InfoAktiv systems are a superb asset and a long-term investment because they can be used and re-used for any subject. Displays never need to become stagnant or out-of-date.

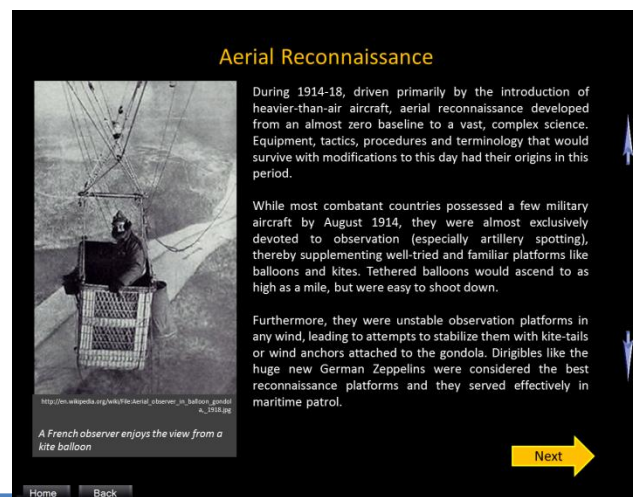

What's in the Package?

Over 20 screens of information covering Aviation during World War 1. Includes an introduction, Technology of Aviation and Major events. Technology includes descriptions of Zeppelins, the Fighter ace, Aerial Reconnaissance, Machine gun synchronization, Bombing, and Anti-Aircraft Weaponry. Major events includes how Aviation was used pre-war, during the Fokker Scourge, Bloody April, at Verdun and the Somme and during the Spring Offensive.

Layered Information

The basic package is designed to allow visitors to 'dip in' and find out about the topics that interest them. This works for the casual visitor who has limited time to spend on individual items or somebody who wants to dig deeper into specific topics. Owners can add any amount of further information to this package or rearrange the contents to suit their own displays.

Simple to Use

Just touch a picture and it takes the user in to the category or item selected.

Easy to Change

If you, as the system's owner, want to change the layout or structure it is as easy as rearranging folders and files with Windows Explorer.

Graphics, text and categories can be customized and expanded to add your own information or branding. Anybody with basic PC skills can do this.

The description pages are easy to modify using PowerPoint, and an infinite number of folders containing further information can be created using everyday software packages and formats.
