

## World War 1 Interactive Display Package

# British Artillery

- ✓ Easy to Modify In-House
- ✓ Vast Capacity to Expand
- ✓ Free

***A short package providing an overview of the British Artillery used in World War One. Use it 'as-is' or as the basis to build your own interactive display.***

Playing one of the major roles in creating the stalemate on the Western Front, Artillery is key in our understanding of WWI.

World War 1 British Artillery is an off-the-shelf multimedia package designed especially for museums. It can be used as-is or tailored in-house by individual museums to add whatever extra information they want. The graphics and branding can be changed too so that any museum can tailor it to 'make it their own'.

### **The Benefits of Using InfoAktiv.**

Because it runs on an InfoAktiv system, the package is amazingly easy to tailor, expand, adapt and update. It can be modified by anybody who can use a PC. This removes any reliance or expense associated with using outside contractors and makes it a perfect and very gratifying project for volunteers to work on.

InfoAktiv systems are a superb asset and a long-term investment because they can be used and re-used for any subject. Displays never need to become stagnant or out-of-date.

## What's in the Package?

### Descriptions and Statistics of:

Almost all the artillery used by the British in the First World War, including Guns, Howitzers and Self-Propelled artillery.

### Concise information

The basic package is designed for the 'casual' visitor who has limited time to spend on individual exhibits but wants a fairly quick understanding of the history, of World War 1. However, there is nothing to stop a museum adding any amount of more detailed information.

### Simple to Use

Just touch a picture and it takes the user in to the artillery piece selected.

### Easy to Change

If you, as the system's owner, want to change the layout, structure or content it is as easy as rearranging folders and files with Windows Explorer.

Graphics, text and categories can be customized and expanded to add your own information or branding. Anybody with basic PC skills can do this.
